

Computer and network infrastructure supporting learning, research, services, and administration

No.	Infrastructure / Information System	Responsible Unit	Service / Usage	Support for the mission of the program and the university	Primary Users
1	The university's computer network and internet system	Office of Academic Resources and Information Technology	Provides data connectivity and exchange through the network system for use in learning, teaching, and administration	Supports online learning, information retrieval, the use of digital databases, and communication among students and instructors	Students/Academic Staff
2	Procurement of computers, equipment, media, and software	Office of Academic Resources and Information Technology / Faculty	Sets standards for and procures the equipment necessary for teaching, learning, and operations	Supports laboratory-based learning, report preparation, presentation, and data analysis	Students/Academic Staff
3	The university's central database and information systems	Office of Academic Resources and Information Technology	Develops central data systems to support teaching, learning, and administration	Enables the program and faculty to access data for decision-making, student monitoring, and program administration	Students/Academic Staff
4	Educational service systems, such as the instructor system, current student/alumni system, new student system, E-Portfolio, and student information retrieval system	Office of Academic Promotion and Registration	Provides academic and student information for instructors, students, and relevant units	Supports registration, student status monitoring, assessment, and academic data management	Students/Academic Staff
5	The university's e-Service	Office of Academic Resources and Information Technology / Central Units	Provides basic information through electronic media to students, faculty members, administrators, and external persons	Increases convenience in accessing information and services and reduces limitations of time and place	Students/Academic Staff

6	Financial and fiscal information system	The university's finance units and central units	Supports the management of financial, budgetary, and fiscal data	Supports the administration of the faculty and program with accuracy and accountability	Academic Staff
7	Personnel administration system (Hr-Online)	Human Resources Administration Unit	Used to manage personnel data, workloads, and information related to personnel affairs	Supports the faculty's personnel administration and the management of instructor/staff data	Academic Staff
8	e-Office system	University / Faculty	Used for sending and receiving documents, coordination, and internal document processing	Increases administrative speed and reduces paper use	Academic Staff
9	Welfare RMUTT system	University	A medical reimbursement system for university employees	Supports welfare and personnel administration	Academic Staff
10	Office supplies system	University / Faculty	Used to manage supplies, durable articles, and office equipment	Supports the procurement and maintenance of resources used in teaching and learning	Academic Staff
11	The organisation's research management system (DRMS)	Institute of Research and Development / Relevant Units	Used to manage research project data, research budgets, and research reports	Supports the research administration of instructors and units	Academic Staff
12	Information systems for teaching, learning, and online communication	University / Faculty / Program	Supports online learning, communication, assignment submission, and access to course information	Supports the teaching and learning management of the international program with continuity and flexibility	Students/Academic Staff
